DETAILED ACTION

Election/Restrictions

Claims 2, 7, 8, 21, and 30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

This application contains claims directed to the following patentably distinct species of the claimed invention: 1) Figure 5a, the plow; 2) Figure 6, the blade.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Tom Majcher on December 10, 2003 a provisional election was made without traverse to prosecute the invention of the blade, Figure 6, claims 31 and 32. Affirmation of this election must be made by applicant in replying to this Office action. Claim 30 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention of the plow, Figure 5a.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is nowhere in the disclosure any mention of the longitudinal joint having a depth that extends from an external surface of the sheath to a surface of the lumen.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 5, 15, 18, 19, 20, 29, 31, 32, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Schiff (US 4,473,067). Schiff discloses a delivery system comprising a sheath (40), a guide wire (26), a handle (Figures 1-3), a device coupling the sheath to the handle (Figures 1-3), a device configured to split the longitudinal joint and to allow the sheath to be removed (50), a blade (Figure 4a), and a guide mandrel (16).

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, 4, 5, 15, 18, 19, 20, 29, 33, 34, and 35 are rejected under 35 U.S.C. 102(e) as being anticipated by Gardeski et al (US 6,159,198). Gardeski et al discloses a delivery system comprising a sheath (10), a guide wire, a handle (62), a device coupling the sheath to the handle (12), a device configured to split the longitudinal joint and to allow the sheath to be removed (60), and the device coupling the proximal portion of the sheath to the distal portion of the handle is split along the length of the device (Column 3, Line 5).
